# Navigation and routing

[Docs](#) > [Development](#) > [UI](#) > [Navigation and routing](#)

For a discussion of how to use Flutter’s Navigator class with various types of routes, see the [API documentation on the Navigator class](#).

The following [cookbook recipes cover navigation and routing](#):

- [Navigate to a new screen and back](#)
- [Navigate with named routes](#)
- [Send data to a new screen](#)
- [Pass arguments to a named route](#)
- [Return data from a screen](#)
- [Animating a widget across screens](#)
